

## 3D FABRICATED ACRYLIC LETTERS

As an extra service to the sign making trade in Australia and New Zealand, LEDsignSupplies.com now offers a supply service for 3D illuminated letters complete with LED lighting modules already installed and ready for onsite installation.

**Email us your 3D lettering project details including ...**

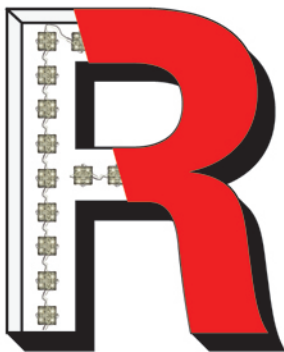

Type face  
Letter height and total length of lettering  
Colour of face  
Colour of return  
Desired depth of letter  
Face opaque or translucent  
Return opaque or translucent  
Any special lighting colours if standard white not required  
ie colour or changing colour RGB LED modules with colour change sequencer.

**We will confirm receipt of quote request and price for you within 24 hours.**

### NOTE -

Letters up to 300mm are fabricated from 3mm acrylic.  
Letters larger than 300mm high are fabricated from 4.5mm acrylic  
Letter backs are mostly 10mm white foamed PVC. (Clear on request)  
Lettering can also be supplied with ready fitted spacers if required.  
Let us know your exact requirements so we can provide all the correct components, fixtures and fittings.

**Each set of lettering we supply, also includes ...**

The correct type and light colour LED module  
Transformer(s) balanced to 80% of Full Load.  
Wiring diagram, notes and installation instructions (on paper plot)  
12v colour coded wiring cable  
Heat shrink for connecting all wires.  
Full size paper plot.  
Fixtures and fittings required for mounting / fixing letters.

### “What about freight?”

We pack lettering sets in robust custom made packing crates using aluminium extrusions and heavy duty plywood panels. Internal styrene foam packing.  
Freight to ANY destination within Australia or New Zealand is included **FREE OF CHARGE.**
